"The Face of your Machine" Custom bezel overlay for proper operation

Example

Before The standard model has function buttons which people tend to press and may lead wrong operation.

[Logo]

[Function buttons]

We do not need the function buttons because we do not use them. Logo is not Necessary, too…

What are those buttons for? What happens if I press them?
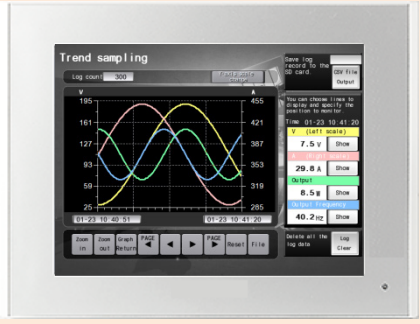

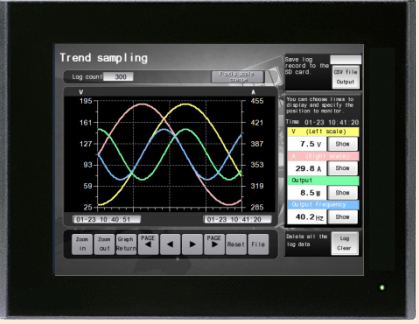

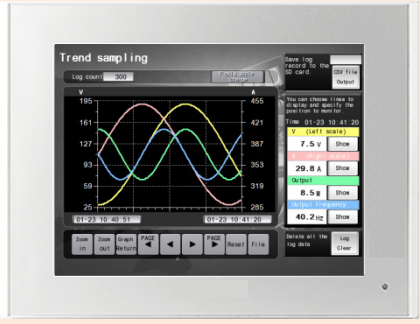

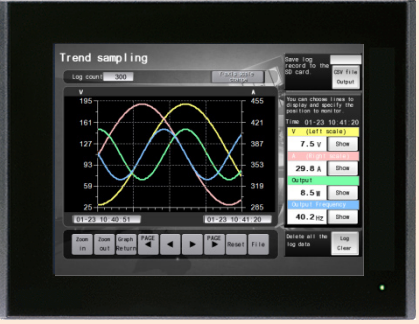

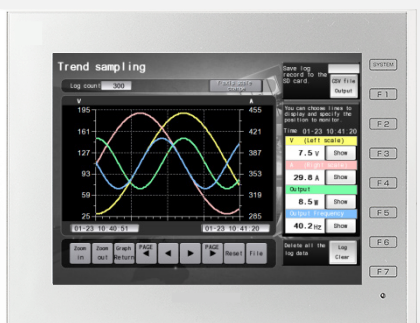

[Logo]

**Try custom overlay models!**

After Reduce the possibility of incorrect operation because there is no function button.

This overlay pulls the whole look together when installed on the machine!

Model code

V9 standard model code followed by –xxxx.

V9☐☐0i☐☐☐☐-xxxx
