Smart Editor A Better Configuration Environment

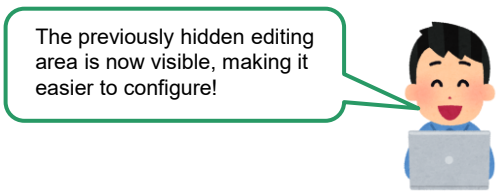

-- More intuitive and effective --

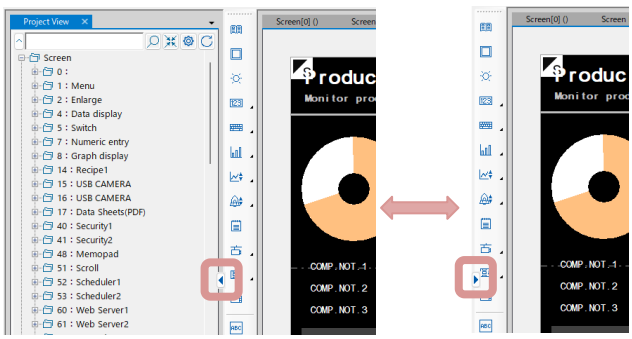

Every “this is inconvenient” frustrations thoroughly eliminated! The newly enhanced, even more user-friendly “Smart Editor” provides a comfortable configuration experience!

Project view: Increase operational efficiency with 3 UI improvements

1. Show and hide the project view with a single click!

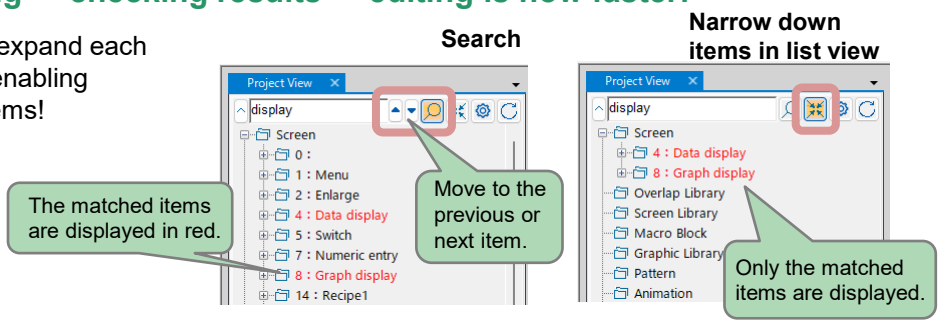

You can quickly show and hide the project view with a single click, allowing you to seamlessly switch between expanded editing space and checking the overall structure.

2. The workflow of searching -> checking results -> editing is now faster!

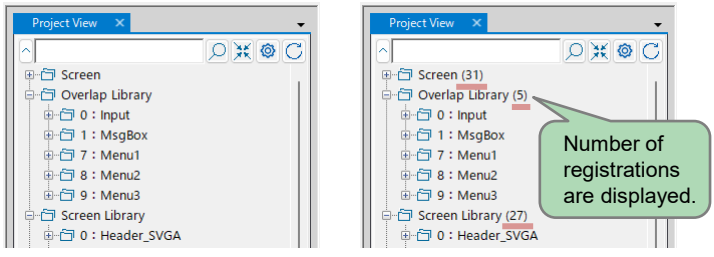

You no longer have to manually expand each item one by one after a search, enabling instant access to the matched items!
This speeds up the workflow.

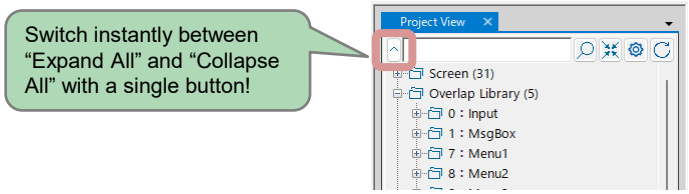

3. Grasp the overall volume and status at a glance!

You can instantly grasp the full project structure with item counts, streamline management and navigate directly to what you need.

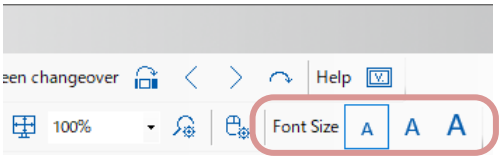

Setting location: [File] -> [Properties] -> [General] tab -> select [Show number of registrations (xx)] checkbox

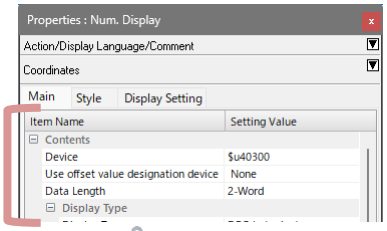

Choose from 3 font sizes for properties!

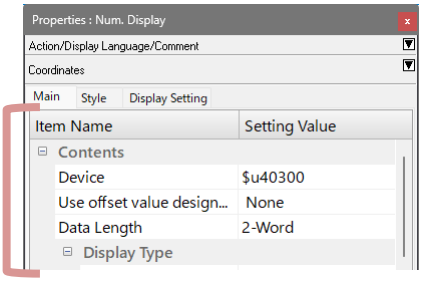

You can adjust the font size to suit your computer, reducing eye strain and creating a stress-free environment even during long operation.

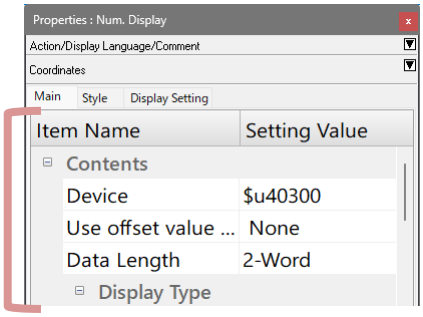

Small (8pt)

Medium (12pt)

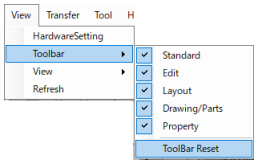

Large (24pt)

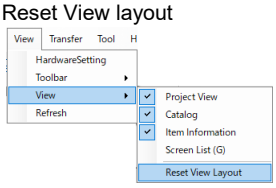

The changed font size is saved, allowing you to edit in your preferred environment even when you launch Smart Editor next time!

Other settings like toolbar and view layout are also saved. You can easily reset them to default from the "Reset" option in the [View] menu anytime.

- Reset Toolbar

- Reset View layout

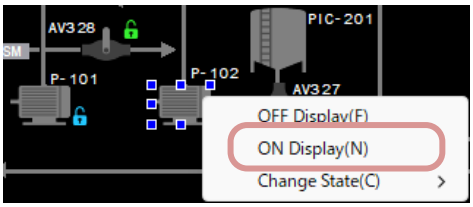

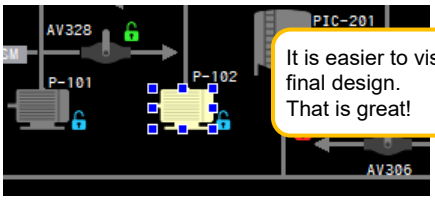

Easily switch displays for the targeted switch/lamp pattern!

OFF ON

You can switch the pattern for only the selected switch/lamp with a single click. Other switches/lamps remain unchanged, allowing you to choose between batch confirmation and individual confirmation.

All OFF display

Setting location: [File] -> [Properties] -> [General] tab ->
select [Allow individual switching of switch/lamp display status] checkbox
