

Limitations of the V10 Series

The V10 series has some limitations on V9 compatible standards and functions.

1. Standard Limitations

Standards	Details	Scheduled date of support
UL121201	Hardware version a: Not supported	
	Hardware version b or later: Supported	Supported from July 2023
Marine approvals	Nippon Kaiji Kyokai (NK)	From products manufactured in October 2023 Ser No. : 2310xxxxx or later
	Lloyd's Register of Shipping (LR) American Bureau of Shipping (ABS)	From products manufactured in November 2023 Ser No. : 2311xxxxx or later
	Det Norske Veritas (DNV)	From products manufactured in December 2023 Ser No. : 2312xxxxx or later

*1 The manufacture date and hardware version can be confirmed by the serial number printed on the label on the back of the unit.

2. Functional Limitations

Function	Configuration Software		Scheduled date of support
	Smart Editor	V-SFT Ver. 6	
1) Video / RGB	Supported Ver. 1.0.2.0 or later	Supported Ver. 6.2.6.0 or later	Released in April 2025 System program Ver. 1.400 or later OS Ver. 1.50 ^{*2} or later * Refer to Notes.
2) Printing with PictBridge	Supported Ver. 1.0.0.0 or later	Supported Ver. 6.2.2.0 or later	Released in October 2023 System program Ver. 1.100 or later OS Ver. 1.10 ^{*2} or later
3) VNC server • KeepAlive function			
4) Operation logs • Username log and MAC address log for VNC clients			

*1 For Configuration Software Ver. that does not support, refer to "3. Details on Functional Limitations" for more information.

*2 Update OS by using a storage device (SD card or USB flash drive).

* Notes

Video/RGB is available for V10 models with "G" in the model number (e.g., V1010iSG) with the optional unit "GUX-xx" for V10. Video/RGB is not available for V10 models without "G". Please purchase a new one.

3. Details of Functional Limitations

If the version of the software is older than that listed under "2. Functional Limitations", the following operation will occur.

1) Video / RGB

The optional units for V10 are under development. The optional units "GUR-xx" for V9 cannot be used with the V10 series.

<Screen Data>

- Video / RGB parts cannot be newly placed.
- When converting from old model, the warning occurs in the error check window if the Video / RGB parts is used in the screen data.

<V10 Unit Operation>

- Even if the warning occurs in the error check, the V10 unit can run. However, the Video / RGB display area is not displayed.
- A "Setup Error" is displayed on the Local mode screen.

2) Printing with PictBridge

Printing is not available with PictBridge compatible printer.

<Screen Data>

- "PictBridge" can be selected for the printer model, but the warning occurs in the error check.

<V10 Unit Operation>

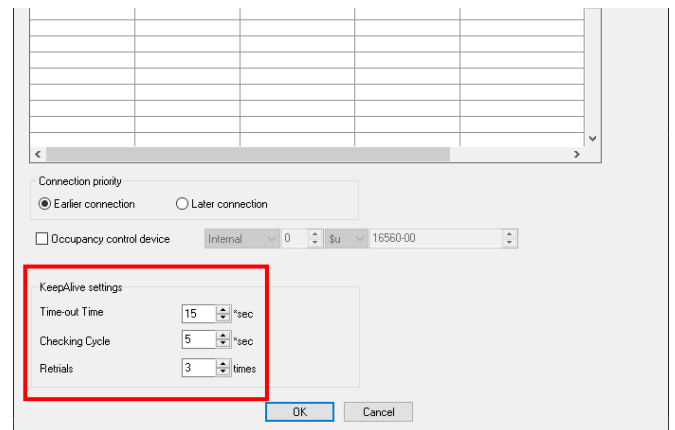

- Even if the warning occurs in the error check, the V10 unit can run. However, printing operations are not possible.
- A warning message is not displayed in the Local mode screen.

3) VNC Server Setting: KeepAlive Function

KeepAlive function cannot be operated with the V10 series.

<Screen Data>

- [KeepAlive Settings] is available in [VNC Server Settings], but the warning does not occur in the error check.

4) Operation Logs: Username Log and MAC Address Log for VNC Clients

When using the operation log, it is not possible to distinguish between operation logs on the V10 unit and the VNC clients. When using the VNC client to operate V10, the username and MAC address cells are empty.

<Screen Data>

- Even if [Save operation by VNC] is checked in [Operation log setting], the warning does not occur in the error check.
